

EECS 448 Project 3 Documentation

Team: CodeHers

Freshman Starter Kit

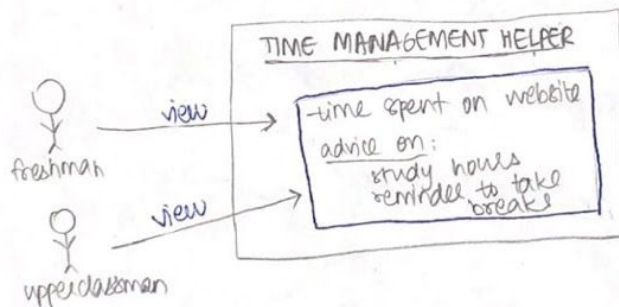

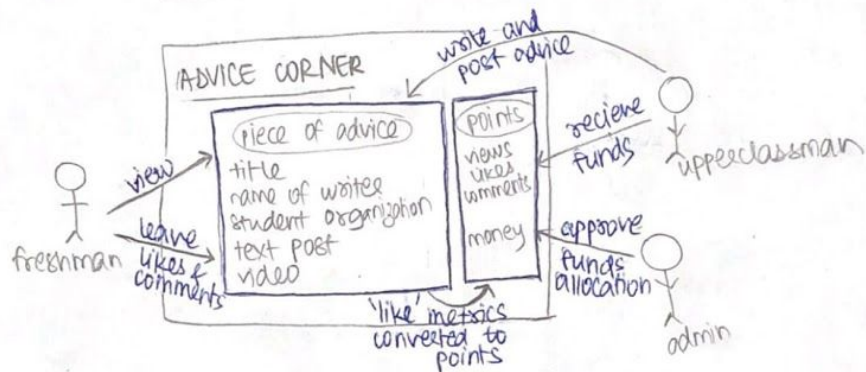

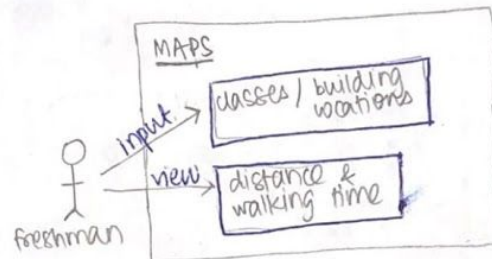

UML

State Diagram

Hitting 'begin' triggers a timer to keep track of how much time has been spent on the website. This shows up on the time management page and offers tips on taking study breaks.

Scrum Artifacts

Product Backlog

1. Login
 - a. Create account to navigate the website
 - b. Use Django authentication system and create user objects
 - c. Ambitious goal- give role based access based on if it is a freshman, upperclassman or admin
2. Rate my class
 - a. Upperclassmen rate EECS classes to help freshman decide their course load
 - b. Will need a ratings form and a page to view all of the ratings in blog form
3. Upload advice videos
 - a. Gain beak - em - bucks or money for your student organization if your videos get more likes/comments
 - b. Upperclassmen rate can upload blog posts of advice or videos
 - c. Use template from DjangoGirls workshop blog project
4. KU Maps
 - a. Marks places you have classes shortest distance, walk time
 - b. Database and model object with location coordinates of buildings - use CSV, calculate the shortest distance between the two location coordinates, use average walking speed to determine walking time
5. Time Management
 - a. Reminders to take break depending on how long they have been active on the website. "Enter Website" button on homepage triggers timer to start.
 - b. Need a way to track time spent on website using Django/Python built-in methods

Sprint Backlog for Project 3

Sprint 1

- UML for Web UI
- Gantt Chart
- Django installation and tutorial

Sprint 2

- Reinstalling django and virtual environment to troubleshoot
- Admindocs- documentation generator (install docsutil)
- Linking other landing pages from the homepage

Sprint 3

- Put together documentation pieces
- Clean up home page
- Division of labor-task assignments, and deciding the scope of the project
- Anjali and Sindhu started working on the landing pages -Rate My Class & Advice Page.
- Victoria and Archana started working on the forms required for the KU Maps and Rate My Class pages

Sprint 4

- Finish Diagrams required for documentation
- Finish the landing pages for the 4 options
- Model forms for Maps (Archana) - Model forms saves the user input to database and allows you to output it to the website
- Finish Gantt chart

Sprint 5

- Attend Django workshop
- Finish the landing pages for the 4 options
- Model forms for Maps and landing page (Anjali)
- Backend distance calculator- in progress (Archana)
- Model forms for Rate My Class (Victoria)
- Documentation (Sindhu, Archana)
